*Note: On 19 May 1891 the Tsarevich Nicholas officially laid a stone at Vladivostok, as a prelude to what was called the "first great enterprise of the 20th century", heralding the "longest railway in the world" over 5,000 miles in length. The Tsar had made known his ambition to build a railway connecting Moscow with Peking, and in connection with the Paris International Exhibition of 1900, when the Trans-Siberian Railway was almost completed, a publicity postcard captioned "PANORAMA TRANSSIBÉRIEN" was designed with a caption at the bottom "DE MOSCOU A PÉKIN (CAMPEMENT KIRGHIS PRÈS DE TOMSK)". China and major western powers were engaged in the Boxer Movement of 1900 and this gave Russia the opportunity to enter Chinese Northeastern Provinces to complete the Chinese Eastern Railway, from Manchouli to Vladivostok and from Harbin to Dairen.*

## Appendix: Postcards from a Russian soldier serving in the Russo-Japanese War of 1904–05

Towards the end of the nineteenth century, both Russia and Japan wanted to have full control of the Chinese Northeast Provinces, for territorial expansion and for the rich natural resources. The completion of the Chinese Eastern Railway by Russia within the Chinese Northeast Provinces in 1903, connecting Manchouli with Suihen and Vladivostok in the east-west direction, and Harbin with Port Arthur in the north-south direction, effectively hindered similar ambitions on the part of Japan.

Without prior warning, the Imperial Japanese Navy attacked the Russian fleet anchored at Port Arthur on 8 February 1904 and war was declared on 16 February. Russia also announced on February 16 that the Trans-Siberian Railway was to be temporarily closed.

Picture postcards of the Russo-Japanese War were prepared, most of which depict war scenes, some with both Russian and Japanese stamps cancelled by postmarks of the relevant post offices. The card at left depicts the Russian fleet anchored at Port Arthur in flames with thick clouds of smoke.

To ensure the prompt transfer of artillery and soldiers, the former were carried across Lake Baikal, on tracks laid on the thick ice. This artist's impression is rather imaginative, but tracks were certainly laid on the ice, on sleepers lengthened to spread the load, and although wagons were mostly pulled singly by horses, steam locomotives might also have been used. (Fig. 2)

**Note 1** Dr. Wilhelm Filchner was a German explorer/geologist. Between 1903-05 he led a geological expedition in Tibet. Later he turned his attention to survey of the Antarctic continent leading an expedition in 1911. He then went back to his first love, the Tibetan Plateau. Between 1926-28 he led an expedition to chart the earth magnetic field on the Tibetan Plateau. This cover was addressed to him during this last expedition. He also published in 1928 a book (in German) on this expedition: *On Mani Padme Hum: Meine China-und Tibet Expedition 1925-28*.

**Note 2** There was no direct route westwards from Sining to Tihwa of Sinkiang Province, mail had to be delivered eastwards via Tangar to reach Lanchow before turning west on the established inland route to Tihwa.

**Note 3** The 4 cents postage indicated domestic postage within China, now that the cover had to be redirected "via Siberia", international postage would be applicable and the difference in postage was made up by additional stamps probably affixed at top right cover front below which is the handstamp requesting Calcutta office to collect the complimentary postage from the addressee.

**Note 4** There was no transit cds to evidence the actual taken by this cover before its trip on the Trans-Siberian Railway, there are two likely possibilities, one of which was to exit Sinkiang at Ierbkoszetang and the other was to exit at Tacheng via Tihwa.

**Note 5** There was, perhaps at a later date, a mail route from Southern Sinkiang to India but this route was not taken in this instance.

### *The Chinese Eastern Railway Incident of 1929.*

Chinese Nationalist Government persuaded Marshal Chang Hsueh-liang, then warlord of Northeast Provinces, to nationalize the Chinese Eastern Railway and acting upon such advice, Marshal Chang dismissed all Soviet heads of Chinese Eastern Railway departments and divisions and there were group firings of other Soviet workers, with about 60 deported to USSR and some 200 other held under arrest. Marshal Chang Hsueh-liang deployed 60,000 troops facing the Soviet frontier in preparation for Soviet retaliation.

On July 28 1929, the Union of Socialist Soviet Republic broke off diplomatic relationship with China. On September 7 1929 Soviet bombers bombarded Suifenho and initiated military conflict. Later in October, Soviet armies were victorious at several military engagements taking place at Fushan, Mishan and Suifenho. The decisive battle took place on November 27 1929 when Chinese armies stationed at Manchouli and Chailainoreh had been routed by Soviet army which went on to capture Hailar, forcing the young marshal Chang to sue for peace.

*Note 1: The setting up of Manchukuo in Chinese Northeast Provinces effectively cut off "Via Siberia" mail service because mail could no longer be delivered to the Russian Post Office at Manchuli. In an effort to connect Europe via Siberia, China National Aviation Corporation tried to establish an airline from Shanghai to Tihwa via Peiping with further extension to Tacheng in the hope that mail items could be exchanged with Russian Post Office at Tacheng or beyond. At around the same time, wooden overprint of "AIRMAIL" on junk stamps with Sinkiang overprintd were issued for use in Sinkiang, mostly used from Tihwa and Hami, only two examples of its use from Tacheng has been recorded, including this item.*

Dear Mr. Reimer:  
I am sending you today the things  
you asked for, which you asked for about  
Feb. 1st. I hope they reach you in  
good shape. These are a little smaller  
than I asked for and if they will  
not do I will try again. The man  
offering them are from good trees, I  
have been here long time a good

Jenshou Feb 8/16  
Dear Dr. Kilborn,  
Word yesterday, on arrival  
of your letter.  
Mr. Chen is having trouble  
with his digestion and is  
saying things that are  
fanciful. Our leaving to leave  
first row when his work  
begins to look up, is  
not very promising either.  
Sincerely  
Hao Chen

En Route, just above Pew Chow  
Feb. 7th 1916.  
Dear Doctor:-  
Just a word to let you know that we are  
away. Perhaps we will keep to the beat as far as Lu  
Chow, thus keeping track of our good that far.  
An sorry that the statistics from  
Tselutsing, and Jenshou, have not yet come to hand  
so that I am unable to finish the summary of the  
report of work. Otherwise it would have been in your  
hands ere this.  
Am glad to say that Mrs. E. is steadily  
improving, she gained a pound last week. They expect  
to leave by homelost in about a week's time.  
Morgans hope to be down to-morrow or the next day  
Sincerely

拙作《地區郵集之一：山東及威海衛》在2005年9月出版後不久，英國的史賓克(SPINK)拍賣公司於同年11月在香港舉行了一次公開拍賣會，本人有幸增添數件心儀已久的郵封，打算在五個地區郵集的專著全部出版後，開始編寫英文注釋時作為補充資料用。由於研究福州總局和福州城內分局的日戳演變過程時，本人得到極大啟發：原來從收集、研究或者展示郵戳，並非止於最早、最晚使用日期及藏品外觀品相，反而應該深入研究每一類戳記為何出現，其沿用時段和日後遭受棄用的原因才是，如此一來郵戳將會變成一種富有生命的郵品，在郵壇的地位總有一天超越郵資和郵路這兩類研究。

大清國家郵政時期，山東省和威海衛所使用的戳記可謂多彩多姿，把本人迷了四份之一個世紀，每當心曠神怡時總會分析自己為何如此着迷，仍百思不得其解，直至研究福建省戳記演變時才恍然大悟：原來這迷人的元素是結合璨爛而緊湊的規範化和演化而形成的十個浪潮。有了結論後接下來是如何與郵友共享這份喜悅，埋頭苦幹了一星期後已有初稿，刻意以表格形式來標示十個浪潮，加入有關戳記的插圖增加閱讀興趣，再經芮偉松、周林兩位顧問的參詳後便完成以下表格。

Two months after the release of my first book entitled "Regional Collection No.1-Shantung Province and Weihaiwei" in September 2005, international auction house SPINK held a public auction in Hong Kong featuring the Weihaiwei collection formed by Mr. Charles Goodwin and to my sheer delight, I was able to acquire a few long awaited items which I intend to include as supplemental information in my explanatory notes covering the five regional collections. Whilst studying the evolution of cancellations from Foochow head office and Foochow City sub-office, I was addicted to a new type of experience to study why a particular cancellation appeared at that particular point in time, what were its functions and duties, why and when was the use of this cancellation discontinued. In so doing, the cancellation becomes, as it were, a living being observing strictly the natural law of evolution. If the philatelic public tries to look at cancellations in this entirely different perspective, they will be mesmerized by their ultimate findings that all cancellations of the Imperial Chinese Post period are "alive and kicking" and that they appear and disappear along with others in distinct waves of evolution or standardization. Once they reach that conclusion, it is not difficult to foresee that the status of cancellations will in future excel the status of two other specialized study topics of "postage" and "postal route".

The diversity of cancellations from Shantung Province and Weihaiwei in Imperial Post period had enchanted me for quarter of a century, I tried to look at them impartially and study the essence of their charm but to no avail. The study of evolution path relating to Foochow head office and Foochow City sub-office has unwittingly induced me to repeat the same exercise for Shantung Province and Weihaiwei, an exercise which ultimately revealed the magical element in the form of ten tightly intertwined waves of standardization and evolution. The joy of such a finding is too great to contain and a week's diligent efforts on my part produced the first draft, purposely using tabular form to record the ten waves, with insertion of appropriate cancellations to facilitate reading and the final version, after alterations and amendments from consultants Messrs. S. Juai and Zhou Lin, is listed here below.

(1) 1897 年 2 月 第一波 過渡時期 (全英文海關日戳及八卦戳)  
 (1) FEB 1897 First Wave (Transition) (Customs dater & Pa Kua cancellations)

一八九七年二月，海關試辦郵政後之烟臺改組成為大清帝國國家郵政局時，可供使用的銷票戳僅有烟臺海關日戳（圖1）及八卦戳（圖2），前者墨色為黑及棕色，後者墨色為棕色。一八九七年中甸，日本訂製的大圓戳到達後，海關日戳開始停用但八卦戳繼續如常使用，由於八卦戳缺乏漢英文地名和日期的原故，因此銷票功能逐漸被英漢大圓戳取代。

（注：郵戳下之頁號指《地區郵集之一：山東及威海衛》書中頁號）

When Customs Chefoo was reorganized to form Imperial Post Office Chefoo in February 1897, the only available cancellations were the CUSTOMS CHEFOO dater (fig.1) and the Pa Kua cancellation (fig.2), the former in black and brown colours and the latter in brown colour. With the arrival of the Dollar daters in mid 1897, the use of the Customs daters ceased forthwith, but the Pa Kua was still used as usual, but its use gradually discontinued in 1898 owing to lack of name and date.

(2) 1897 年 6 月 第二波 規範化 (英漢大圓日戳)  
 (2) JUN 1897 Second Wave (Standardisation) (Dollar daters)

大清郵政總局在一八九七年五月份開始將其在日本訂製的英漢大圓戳分派給各郵區的總局應用。就山東省而言，祇有烟臺一地分配到兩枚英漢大圓戳，戳式分為 I 型（圖3）及 II 型（圖4），祇是英文“FOO”出現極微的不同位置和中文“局”之極微字體差異來區分。據目前記錄，烟臺大圓戳使用日期自 1897 年 7 月 16 日至 1899 年 4 月 29 日。墨色見黑、藍、棕三種。另外，烟臺大圓戳之一月 JAN（圖5）及九月 SEP（圖6）的寫法正確而沒有錯誤，但到了 1898 年閏三月時，烟臺郵局既不用閏三月，又不用閏月而錯誤地重用三月（圖7），成為各地大圓戳僅有之例。

Dollar daters made from Japan had been handed down to various head offices in May 1897 and Chefoo was the only post office in Shantung Province authorized to use these Dollar daters which lasted from July 16 1897 to April 29 1899. Two different types existed, distinguishable by noting the relative position of English alphabets FOO against a vertical and another 45 degree grid lines and a slight discrepancy in the shape of the character 局 (fig.3&4). These Dollar daters were used in blue, black and brown colours, the abbreviations JAN and SEP were both correct (fig. 5&6) but the same "Third" month (三月) was used again erroneously for the "Intercalary Third" month of 1898 (fig.7).

(3) 1898 年 11 月 第三波 演化 (英漢陰文式圓形銷票戳)  
(3) NOV 1898 Third Wave (Evolution) (Circular negative seal type bilingual cancellations)

大清郵政總局在 1899 年 2 月 15 日發出的第 15 號通告裏已顯示了威海衛和登州府這兩個四等郵局的存在。一直以來，大清郵政總局注意力都放在各郵區總局和一等郵局身上，根本無法兼顧較低等級的郵局而任由其自行運作。一件由登州寄至美國的西式封上，記錄了登州郵局在 1898 年 11 月時演化出一枚英漢陰文式圓形戳（圖 8），英文“POST OFFICE TENGCHOWFOO”排在兩圈上下之間而中文“登州府郵政局”排在內圈。威海衛郵局亦曾沿用同類型英漢陰文式圓形戳（圖 9），但英文字樣為“IMPERIAL POST OFFICE WEIHAIWEI”，記錄到的使用時間為 1899 年 3 月。青州郵政局雖然開局較遲，但也湊熱鬧地採用了“IMPERIAL POST OFFICE CHINGCHOW 青州郵政局”英漢陰文式圓形戳（圖 10），使用日期却遲了數年。

According to Postal Notification No. 15 dated February 15 1899, Imperial Post Office Weihaiwei was already in existence with Tengchowfoo, both 4th class post offices without any implicit authorization to make cancellation of their own. Tengchowfoo evolved a negative seal type circular cancellation with bilingual inscriptions “POST OFFICE TENGCHOWFOO 登州府郵政局”(fig.8) and was used on a 1898 cover to U.S.A. as issuing dater, the Japanese 10sen stamp being canceled by Shanghai I.J.P.O. dater of 25 NOV 98.

A similar negative seal type circular cancellation also evolved from Weihaiwei with bilingual inscriptions “IMPERIAL POST OFFICE WEIHAIWEI 威海衛郵政局”(fig.9) which canceled stamps on a March 1899 Sino-French combination cover to England and another cover to Shanghai around the same time (transit through Chefoo on March 17, 1899) in combination with Courier Post. Chingchow Post Office also adopted this circular negative seal type “IMPERIAL POST OFFICE CHINGCHOW 青州郵政局” bilingual cancellation (fig.10) but its recorded usage was after 1900.

(4) 1899 年 4 月 第四波 演化 (英漢橢圓形及雙圈型日戳)  
(4) APR 1899 Fourth Wave (Evolution) (Oval or double circle bilingual daters)

威海衛租借地之大清郵政局順應外國居民之增加而需要一枚英漢日戳來銷票，自行在 1899 年 4 月演化出 37 × 21 毫米英漢雙綫橢圓形日戳（圖 11），其後因為膠質的日戳損耗甚快，故此在 1899 年 11 月至 1900 年 6 月之間又衍生了五款不同尺碼及框綫的橢圓形日戳來交替使用，並且均為單綫型，計為 40 × 23（圖 12）、42 × 22（圖 13）、44 × 25（圖 14）、42 × 23（圖 15）及 44 × 22（圖 16）。

Weihaiwei Post Office soon found the negative seal type cancellation ineffective because of lack of date. As more and more foreign residents arrived in Weihaiwei, this 4th class Imperial Chinese Post Office evolved another  $37 \times 21\text{mm}$  double frame type oval bilingual dater(fig.11), with earliest usage on April 22,1899. The rubber daters began to show wear and tear half a year later, and from November 1899 to June 1900 five different single frame new types appeared:  $40 \times 23\text{mm}$ (fig.12),  $42 \times 22\text{mm}$ (fig.13),  $44 \times 25\text{mm}$ (fig.14),  $42 \times 23\text{mm}$ (fig.15) and  $44 \times 22\text{mm}$ (fig.16).

由於洋人的聚居，另一間支局在威海衛往劉公島的碼頭附近開業，其所沿用的英漢日戳為雙圈式，“WEIHAIWEI 威海衛郵政局”放置在兩圈上下之中而英文月(3個字母)及日、年(僅用兩位數)置在內圈中央，在最初使用時，年份99誤植為90(圖17)。山東省其他郵局中，祇有黃縣(HWANGHSIEN)一地曾在1901至1902年間也採用同類型日戳(圖18)。

圖17 P256

圖18 P142

A branch post office opened at the ferry point of Ma Tau in the walled city of Weihaiwei and it evolved a double circle bilingual type dater with inscriptions “WEIHAIWEI 威海衛郵政局” arranged between circles and the month/day/year arranged in two horizontal rows in the centre of the inner circle (fig.17). Hwanghsien was the only post office in Shantung Province to have produced similar type of dater (fig.18).

本人認為山東省其他郵政支局也十分渴望採用英漢日戳。他們似乎靜觀其變，等待大清郵政總局怎樣處置威海衛這個擅自製造英漢日戳的四等郵局。但經過數月的期待後，萊州(圖19)和膠州(圖371)兩局却率先在1899年7月份採用英漢文橢圓形日戳，其他16處郵局相繼跟隨，支局分別為昌樂(圖20)、濟南(圖21)、青州(圖22)、周村(圖23)、黃縣(圖24)、高密(圖25)、沂州(圖26)、萊陽(圖27)、寧海(圖28)、平度(圖29)、沙河(圖30)、泰安(圖31)、登州(圖32)、濟寧(圖33)、鄒平(圖34)和濰縣(圖35)，使用日期最晚見青州1904年5月一例(圖36)。

Other post offices in Shantung Province did not dare to follow Weihaiwei in adopting a bilingual dater and they waited to see the reaction of the Postal Administration Head Office towards the unauthorized adoption of cancellations on Weihaiwei's part. Three months had elapsed and the Postal

Administration Head Office was still silent on this issue. Laichow(fig.19), and Kiaochow(fig.37I) produced their version of the oval bilingual daters in July 1899, soon followed by 16 other post offices of Changlo (fig.20), Chinan (fig.21), Chingchow (fig.22), Choutsun (fig.23), Hwanghsien (fig.24), Kaomi (fig.25), Ichow (fig.26), Laiyang (fig.27), Ninghai (fig.28), Pingtu (fig.29), Shaho (fig.30), Taian (fig.31), Tengchow (fig.32), Chining (fig.33), Tsouping (fig.34) and Weihsien (fig.35). The use of these oval bilingual daters lasted until May 1904 (Chingchow, fig.36) when they were replaced by the standardized lunar year daters. For Weihaiwei, the activities of the Boxer Movement had forced the post office to be relocated to Liu Kung Tau and the use of oval bilingual daters ceased around June 1900.

膠州郵政局為國際交換局，郵務繁忙，局員衆多，祇依靠 1899 年 6 月份下發的漢英單綫半切圓形日戳是不敷應用的，終於耐不住而衍生了 16 款不同尺碼、月 / 日 / 年或日 / 月 / 年排列方式、六角或八角星飾來區分的橢圓形英漢日戳，方便與日俱增的支局或各郵務人員使用，無形中以戳式的些微區別來厘定職責誰屬。總共 16 型以圖 37 展示。

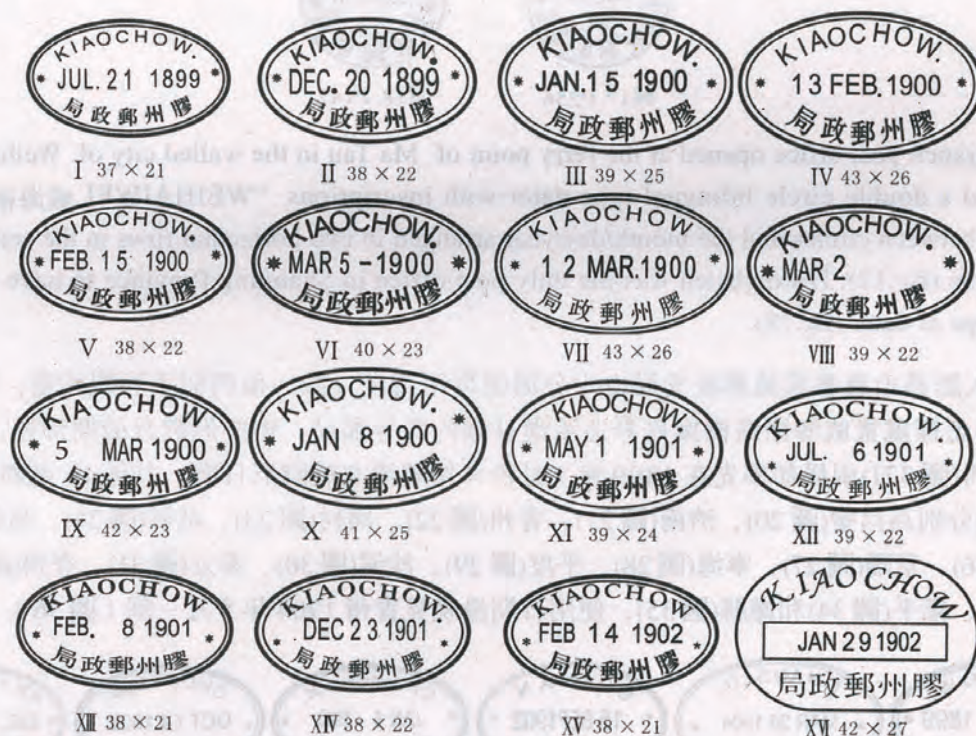

圖37 P59

Kiaochow Post Office evolved 16 different types of oval bilingual daters for use by its many postal staff and branch offices, bearing in mind that Kiaochow was an international exchange station, handling quite an amount of foreign mail to Europe via the German Post Office Kiautschou. These 16 types are collectively shown in fig.37.

(5) 1899 年 6 月 第五波 規範化 (漢英半切圓形日戳)  
(5) JUN 1899 Fifth Wave (Standardization) (Circular bisected bilingual daters)

大清郵政總局在 1899 年 4 月份開始下發小型 25 毫米漢英單綫半切圓形日戳給全國各郵區總局及一等郵局，並同時要求各局退回大圓戳注銷。以山東省而言，僅有烟臺、膠州及濟南三局獲派此類日戳，使用時間自 1899 下半年直至民國年間。烟臺漢英單綫半切日戳分兩型。第一型約 1899 至 1900 年間，戳內六個英文字母排列不均：如 CH\_EF\_OO (圖 38)，第二型到了 1902 年後，所有六個字母均勻排列戳內 (圖 39)。濟南也顯示了一些獨特的變化，英文名稱初為

CHINAN (圖 40), 到了 1909 年時, CH 兩個字母被鏟去, 形成了不倫不類的 “---INAN” (圖 41), 這種情況持續至民國元年(1912 年)時才正式採用 TSINAN, 尤其 1912 年日戳內漢英文字比較小(圖 42), 而 1913 年日戳內漢英文字較大 (圖 43)。膠州日戳則相當規範, 唯一特點是用一位或兩位數字來顯示年份 (圖 44, 45)。

The Postal Administration Head Office handed down a smaller 25mm circular bisected bilingual daters to various head and 1st class offices for use on international mail items as from April 1899, Chefoo, Chinan, Kiaochow were the only three offices in Shantung Province eligible to use such daters. The 1899 and 1900 examples of Chefoo bisected bilingual daters showed uneven spacing of English alphabets : CH\_EF\_OO (fig.38) but later example in 1902 showed even spacing of these alphabets (fig.39). The Chinan bisected bilingual dater was used at a later date, initially the spelling was CHINAN (fig.40) and the outer circle was very thin. Later examples showed wear and tear to the outer circle, and still later in 1909, a new type had been recorded with CH excised to read “---INAN” (fig.41). Finally in 1912, two different types TSINAN bisected bilingual daters emerged, one with smaller English and Chinese characters (fig.42), the other with larger characters (fig.43). The Kiaochow type was quite standardized, it used one or two numerals to indicate the year (fig. 44&45).

In view of its size, the bisected bilingual dater did not have much “room” to evolve simply because the insertion of indicative numerals or characters would make the dater look awkward. Kiaochow was happy with its diversified range of oval bilingual daters, Chinan evolved circular type non standard dater and cancellations but Chefoo stuck to the rule by using this bisected bilingual dater together with various nameplate cancellations described hereinafter.

(6) 1899 年 6 月及 10 月 - 第六波 規範化 (矩形或圓形牌號戳)  
(6) JUN/OCT 1899 Sixth Wave (Circular/Rectangular  
(Standardization) Nameplate cancellations)

1899 年 6 月 26 日大清郵政總局下發通令：內地分局不會獲派戳記，各局自行依圖示製造矩形兩格式牌號戳，上格置局名，下格置“郵政局”字樣如圖 A。同年 10 月 15 日，郵政通告 15 號授意郵局招攬鋪商代辦郵政並可自行製造矩形兩格式牌號戳如圖 B。

圖 A

圖 B

According to a letter from the Postmaster General dated June 26 1899, no daters had been distributed to inland sub-offices but they were to make wooden cancellations of the type shown in fig. A with post office name in the upper segment and Post Office(郵政局) below. A few months later on October 15 1899 another circular from the Postmaster General instructed post offices to enroll the services of shop merchants as postal agencies and authorized the use of cancellation shown in fig. B.

山東各地郵局依例辦事者衆，一絲不變地採用 A 型者有德州、高密、王台、濟南、靈山衛、青州、台兒莊、柳疃、齊河、泰安府、周村、鄒平和濰縣，濰縣更採用“郵政官局”雙重標準字樣，亦有某些地方郵政局產生輕微變化者如登州(無外框)。此外，也有些郵政局採用圓形兩格或三格式戳記，文字內容與矩形牌號戳相同，計有濟南、周村(三格式)兩款，上述 17 款 A 型戳記一併以圖 46 列出。

圖 46 A 型

Many post offices in Shantung Province complied with above instruction and produced standardized cancellations now listed as type A, including Tehchow, Kaomi, Wangtai, Chinan, Linshanwei, Chingchow, Taiierchwang, Liutuan, Tsiho, Taianfu, Choutsun, Tsouping and Weihsien. Slight variations occurred in two types, namely Tengchow (frameless) and Weihsien "Official" (官局) Post Office. Chinan and Choutsun Post Offices preferred circular type but the inscriptions were the same. All these type A examples are collectively illustrated as fig. 46.

有些郵局選用較大字型列出局名，故此將 A 型兩格內的文字換了位置而讀成上格“郵政局”、下格局名，因為從 A 型衍生而出，所以列為 A1 型，採用此類矩形戳記的郵局計有：沙河、寧海、即墨、濟寧州、兗州府、劉公島、威海衛(有框及無框)、萊州和蒙陰縣等局，圓形戳記有兗州府和濟寧州，一併以圖 47 顯示。

圖 47 A1 型

圖 47 A1 型

Some post offices changed the position of office name and 郵政局(Post Office) so that the office name can be more conspicuous and the ten rectangular types from Shaho, Ninghai, Chimo, Tsiningchow, Yenchowfu, Liu Kung Tau, Weihaiwei, Weihaiwe (frameless), Laichow, Mongyinh sien and two circular types from Yenchowfu and Tsiningchow collectively illustrated in fig. 47 are classified under type A1.

採用 B 型戳記的代辦所錄得十款：登州壹、昌樂壹、烟台壹、即墨縣城陽壹、景芝壹、青州壹、淄川二、金鄉五、泰安五和冠縣十一，總括以圖 48 來記錄。

圖 48 B 型

Ten postal agencies adopted the type B cancellations: Tengchow/One, Chonglok/One, Chefoo/One, Chimo Hsien Yangcheng/One, Kingchih/One, Chingchow/One, Tzechuan/Two, Kinshang/Five, Taian/Five and Koonhsien/Eleven collectively illustrated in fig. 48.

以下六枚戳記不用數字而用其他文字列明分局、支局或代辦所的身份：鴻順德代理郵政分局、濰縣郵政分局(二)、昌邑代辦分局、臨胸代辦分局、圓形有龍口郵政分局和陰文臨胸經理分局，因為是從 B 型衍生出來，所以全部列為 B1 型，一併以圖 49 顯示。

圖 49 B1 型

Six postal agencies used Chinese characters to denote sub-office or postal agency instead of using numbers: Hung Shun Teh Postal Box Office Agency, Weihsien Postal Sub-office No.2, Chongyeh

Box Office Agency, Linchu Box Office Agency, circular Lungkow Postal Sub-office and negative type circular Linchu Box Office Agency all illustrated in fig. 49 are classified under type B1.

另有一種矩形戳式祇列名稱，但無其他文字或數字來區別分局、支局或代辦所，一併列為C型，記錄到款式有青州府(陰文)、趙村、流廷、紅石崖和靈山衛五款，以總括以圖50展示。

圖 50 C 型

Another rectangular type cancellation with name of sub-office or postal agency only, without any other letters or numbers are classified as type C, five types from Chingchowfu (negative type), Chaotsun, Liuting, Hungshihai and Linshanwei are collectively shown in fig. 50.

所可喜者此等牌號戳也自行演化，登州加入分局地址(圖51)，另有六款加入光緒和宣統年號，計為滕縣(圖52)、沙鎮(圖53)、黃河涯(圖54)、界首(圖55)、沂州(圖56)及泰安(圖57)，此七款列為D型。

Additions of extra characters inside the cancellation to give more information occurred and this is evolution within standardization when Tengchow type included the address(fig.51), six other types from Tenghsien(fig.52), Shacheng(fig.53), Wanghoyai(fig.54), Kaishou(fig.55), Ichow(fig.56) and Taian (fig.57) all included space to fill in regal year calendars of Guan Xu(光緒) or Xuan Tong(宣統), month and date, these improved types are classified as type D.

圓形的牌號戳也不停地演化，滕縣加多了英文 TENGHSIEN POST(圖58)，其它源自狗皮集、東村集和潮水集(圖59、60、61)、文登營(圖62)、昌邑夏店(圖63)及平度門村(圖64)的圓形三格式牌號戳都比大清郵政總局通告內的款式優勝。

Circular types from Tenghsien added English name of Tenghsien Post (fig.58), other three segment types from Koupichak, Tungtsunchak, Chaoshuichak(fig.59, 60, 61), Wentengyin(fig.62), Hsiatien (fig.63) and Pingtu Muntun(fig.64) all showed improvement to the nameplate type specified in the postal notices.

威海衛沿用的漢英橢圓形日戳及碼頭沿用的漢英雙圈日戳在 1900 年 6 月突然失去蹤迹，原來“義和團運動”席卷山東及直隸省，1900 年 5 月時山東居民與正在勘察租借地界的英國士兵發生衝突，為了安全起見，威海衛郵局移址劉公島上並開始沿用矩形兩格 A1 型牌號戳，理由有二：其一是依 15 號通告與其他郵局一起採用牌號戳，其二是中文牌號戳在該時該地可避免仇外者的注意。劉公島的 A1 型牌號戳(圖 65)在 1900 年 7 月已發現使用（P255 是目前最早實寄封使用日期），到了 1901 年 2 月時威海衛郵局搬回舊城內也沿用矩形兩格式 A1 型牌號戳(圖 66)，另有一款無外框牌號戳(圖 67)曾在 1902 年使用。

By the time Weihaiwei Post Office relocated to the island of Liu Kung Tau around June 1900, it wisely adopted type A1 nameplate cancellation (fig.65) because bilingual daters were more likely to attract anti-foreign hostilities. As a matter of fact, the Liu Kung Tau type was used first around July 1900, and when the influence of the Boxer Movement subsided, Weihaiwei Post Office moved back to the walled city and began to use nameplate type Weihaiwei cancellation (fig.66) in February 1901. The frameless Weihaiwei type was used at a still later date (fig.67) in 1902.

(7) 1901 年尾至 1902 年初 第七波 演化 (全漢文日月戳及圓形不規則日戳)  
(7) LATE 1901 to EARLY 1902 Seventh Wave (Circular Chinese Language  
(Evolution) non standard, sun & moon daters)

二十世紀初，交通漸趨便利，郵政官局的營運效率亦促使民間郵件從民信局轉移至各地郵局，一般市民十分在意郵件發出及到達的時間，濟南郵局不知何故在光緒廿七年冬月（1901 年 12 月）沿用了漢文不規則圓形日戳（圖 68）；這個先例立即招來不少追隨者，真不知哪個郵局將局名放在上方，郵政局三字放在下方，中文年月日用兩橫行六位數字居中來顯示，兩邊再加上日形（左方）及月形（右方）後，大名鼎鼎的日月戳於焉誕生了。總共十四個郵局採用日月戳，當中也有不少變異，其中“日”形中的黑點變為小圓圈或者外圈消失；“月”形可以似新月或半圓形，正中年月日的排列及閱讀方式更是多彩多姿。1903 年時之“閏五月”，在日月戳內顯示方式有兩種，用又（月）（圖 69、70）或又五（月）（圖 71）。

使用日月戳的十四個郵局分別為安邱（圖 73）、昌樂（圖 74）、即墨（圖 70）、青州（圖 69）、周村（圖 75）、諸城（圖 71）、莒州（圖 76）、沂州（圖 77）、沂水（圖 78）、平度（圖 79）、博山（圖 80）、鄒平（圖 81）、兗州（圖 82）及濰縣（圖 83）。

齊河郵局曾在光緒廿六年五月（1900 年 6 月）衍生了一款類似英漢大圓戳的不規則日戳（圖 84），但這祇是個別例子，並無影響到其他郵局而產生演化波浪，故而順帶一提以增趣味。

Even though only Hwanghsien Post Office adopted similar type double circle bilingual dater (fig.18) evolved from Ma Tau Post Office, the need for a dater instead of a dateless cancellation was overwhelming at the turn of the century when the efficiency of the official postal system had won over many clients from Min Hsin Chu's and both the sender and the recipient of mail items paid keen attention to the dates of dispatch and receipt. Chinan Post Office evolved, in December 1901, a circular Chinese language type non standard dater with 濟南府郵政局(Chinan Post Office) arranged around the circumference and year/month/date in two horizontal rows in the centre (fig.68).

It is still yet unascertained as to which post office first invented the circular sun and moon dater, but the size and arrangement is quite similar to the non standard Chinan type described hereinabove with the inclusion of the sun figure at the left and moon figure at right, the post office name was placed at top and three characters 郵政局(Post Office) at bottom instead of being arranged around the circumference, year/month/date expressed in 6 characters in two horizontal rows at the centre.

An intercalary "Fifth" month occurred in 1903 and a simple Chinese character 又 had been used, sometimes it was singly as 又 at other times to combine with 五 to read 又五; examples from Chingchow (fig.69), Chimo (fig.70) and Chucheng (fig.71) had been recorded.

Fourteen post offices in Shangtung Province adopted this unique type sun and moon daters : Ankiu (fig.73), Changlo (fig.74), Chimo (fig.70), Chingchow (fig.69), Choutsun (fig.75), Chucheng (fig. 71), Chuchow (fig.76), Ichow (fig.77), Ishui (fig.78), Pingtu (fig.79), Pokshan (fig.80), Tsouping (fig.81), Yenchow (fig.82) and Weihsien (fig.83) with usage period from January 1902 to April 1904.

Tsiho Post Office evolved a Dollar dater type non-standard dater (fig.84) in June 1900, but this was an isolated incident which did not trigger any wave of evolution and is hence included here for interests sake.

( 8 ) JUL to AUG 1902 Eighth Wave (Evolution) (Thick outer circle non-standard daters)

1902 年底，西伯利亞火車通車，寄往歐州郵件倍增，劉公島使用的牌號戳既無英文地名又無日期，將由 1902 年 7 月份首次出現的英漢雙圈粗外綫日戳所取代，該戳的外圈特別粗肥，“劉公島 LIU KUNG TAU 威海衛 WEIHAIWEI”字樣放置兩圈上下居中及左右兩側，日月年分三行豎排於內圈（圖 85），最早使用日期為 1902 年 7 月，最遲使用日期為 1904 年 3 月。碼頭郵政支局（MA TAU）亦在 1902 年 7 月至 1903 年 3 月間使用同類型日戳（圖 86），後來“碼

頭”改名為“愛德華港”(PORT EDWARD)，戳內字樣也相應更改（圖 87），而愛德華港日戳也從 1903 年 4 月沿用至 1904 年 1 月。隨着愛德華港的英國郵局在 1904 年 4 月 1 日開業，劉公島及愛德華港之大清郵局因業務驟降隨即關閉。

上述劉公島、碼頭及愛德華港寄出海外的郵件，絕大多數交烟臺俄國客郵循中東及西伯利亞鐵路至歐洲各地。當時烟臺的郵務局長十分在意按規收取威海衛到烟臺的一分內陸郵資，故此在 1902 年底時，劉公島日戳採用紅色油墨來蓋銷郵封上的一分郵資，估計後來因為紅色日戳可能令郵件被當作欠資郵件處理，因此改用紫色、藍色或黑色油墨，更使這類日戳多彩多姿。

In late 1902, the Siberian Railway became operative and the amount of mail items to Europe via this railway surged when the Liu Kung Tau nameplate type cancellation became inefficient because it lacked English name and date. A new double circle type bilingual dater with thick outer circle evolved from Liu Kung Tau (fig.85) and Ma Tau (fig.86) in July 1902, the former used until March 1904 and the latter used until March 1903 when the name “Ma Tau” was formally changed to “Port Edward” and similar type dater from Port Edward (fig.87) was used from April 1903 to January 1904. This type of daters had been used in colours of vermilion, blue, purple and black. The vermilion ink was purposely used to cancel the 1c inland postage from Liu Kung Tau/Ma Tau/Port Edward to Chefoo, probably requested by the Postmaster at Chefoo.

With the opening of the British Post Office in Port Edward on April 1 1904, the Chinese Post Offices in Port Edward and Liu Kung Tau closed because sharp decline in business.

大清時期，威海衛郵政日戳一直是山東省日戳的靈泉，一點一滴都不容浪費。在劉公島日戳出現後不久的一個月間，山東省的寧海郵局衍生了一款漢文單圈三格式粗綫日戳，上格年月日分三行豎式排列，中格為橫向“大清郵政分局”，下格豎排為山東寧海。這種日戳極似日式日戳，但山東省受德國影響多於日本，故此從日本日戳獲取靈感的可能性不大，就時間觀念（即距英漢粗圈日戳相隔一個月）來看，再次參考威海衛日戳的可能性極大，但戳內文字和排列也着實改變了不少！山東省總共有 18 個郵局行用此類日戳，分別是黃縣、萊州、萊陽、臨青、蒙陰、寧海、博山、沙河、石島、泰安、登州、滕縣、曹州、齊河、濟寧、東昌、文登及武定，到了 1903 年閏五月時，日戳內月份正確地顯示了閏五月。圖 88 總括記錄了 18 局日戳及一些閏月例子。

offices which handle international mail items preferred the bilingual circular central box type lunar year daters, but lower ranking post offices still used single and double ring type lunar year daters until Ren Zi (壬子, 1912) as illustrated by single ring types from Tsining (fig.91) and Yenchow (fig.92).

(10) MID 1906 Tenth Wave (Circular central box type lunar year daters)  
(Standardization)

丙午年閏月(1906年5月)開始,江蘇省鎮江郵局已開始採用腰框形全漢文干支戳,過了不久,直隸省的塘沽郵局在丙午年九月演化了“塘沽/TANGKU”腰框形漢英干支戳,後來郵政總局將漢英戳規範為一等郵局以上使用的標準日戳,其他次等郵局如有需要可以採用英漢式。

山東省最早見漢文腰框形日戳為烟台丙午五月初一(圖95);漢英腰框形日戳祇有烟台、濟南和膠州三局使用(圖96、97、98);其他各局使用英漢文腰框形者較多。三種腰框型干支戳沿用至辛亥(1911)年止,祇有青州、周村和博山郵局出現了令人可喜的1912年“壬子”日戳(圖99、100、101),而博山於1913年採用了干支和民國紀年並用的癸丑二年日戳(圖102)。

威海衛郵局何時使用漢文腰框形干支日戳仍未有定案,因為在實寄封及明信片上祇記錄到英漢式己酉年(1909年)(圖103)和庚戌年(1910年)(圖104)日戳,或許很大機會漢文腰框形日戳未曾使用過也不定。

濟南郵局在庚戌(1910)年時採用了較大型28毫米全漢文三格式干支日戳(圖105),甚為特別,順此一提。

The Postal Administration Head Office handed down in 1906, a larger circular type lunar year dater with central box containing the lunar year/month/date. Initially, Chinese language types were first used, with name of province at top and post office name at bottom. At that point in time, the great expansion was taking place and Tangku Post Office in Chili Province evolved a bilingual type with 塘沽 at top segment and TANGKU at bottom segment. As far as Shantung Province is concerned, the earliest usage of Chinese language circular central box type lunar year dater originated from Chefoo on 1st day of 5th month in the year Bing Wu (丙午五月初一, 1906.6.22) (fig.95). Chefoo (fig.96), Tsinan (fig.97) and Kiaochow (fig.98) were the three post offices in Shantung Province to have adopted the bilingual Chinese/English circular central box type lunar year dater whilst other lower ranking post offices followed another evolutionary wave and adopted the bilingual English/Chinese dater.

Unlike Peking, Tientsin and Shanghai which had utilized “room” within the larger circular central box type dater to insert characters to denote sub-office, collecting beats, hours etc., the circular central box type lunar year daters from Shantung Province was pretty much standard and without

variation or evolution until 1913 when Chingchow (fig.99), Choutsun (fig.100) and Pokshan (fig.101) post offices still adopted lunar year of Ren Zi (壬子, lunar year for 1912). In the ensuing year however, Pokshan evolved the rare dual year type dater with year notations of Gui Chou (癸丑, lunar year for 1913) alongside 二年(second year of the Republic)(fig.102).

It is still uncertain whether Weihaiwei had begun to use the Chinese language circular central box type lunar year dater as from 1906 or the Chinese/English type from 1907. The circular central box English/Chinese type lunar year dater from Weihaiwei had been recorded from Ji You (己酉, 1909) (fig. 103), Gan Xu (庚戌) (fig.104) to Xin Hai (辛亥, 1911) and these are very scarce indeed.

The large three segment type Chinese language lunar dater from Chinan (fig.105) is included here as a subject of interest.

在干支日戳廣泛使用的 1904 至 1911 年間，碰上了三次閏月，即丙午閏四月、己酉閏二月和辛亥閏六月。一般來說，月份用閏月便可，但有些郵局却十分仔細，他們沿用閏四、閏二或閏六，更有甚者多加中西曆法並用，組成兩豎行“閏月二月”或“閏月六月”。本人記錄到山東省閏月干支日戳如下：東昌丙午年閏月（圖 106），濟南丙午年閏月（圖 107），即墨己酉年閏二（圖 108）及濟寧辛亥年閏月（圖 109）。

During the period when the lunar year daters had been used from 1904 to 1911 inclusive, intercalary month occurred on three occasions, being intercalary 4th month of Bing Wu (丙午, 1906), intercalary 2nd month of Ji You (己酉, 1909) and intercalary 6th month of Xin Hai (辛亥, 1911). Normally, the word “intercalary”(閏)replaced the month numeral but in some cases, the Chinese character “month” was taken out as well and replaced by “Intercalary Fourth”(閏四), “Intercalary Second”(閏二) or “Intercalary Sixth”(閏六) while other types used two columns to denote the month such as “Intercalary Month/Second Month”(閏月二月, 1909) and “Intercalary Month/Sixth Month”(閏月六月, 1911). Four examples are listed here being intercalary month of Bing Wu (丙午, 1906) from Tungchang (fig. 106), Chinan (fig.107), “Intercalary Second” of Ji You (己酉, 1909) from Chimo (fig.108) and intercalary month of Xin Hai (辛亥, 1911) from Tsining (fig.109).

中華民國在 1912 年元旦成立後，通令各地郵局以民國紀年代替干支紀年，漢英圓形半切日戳仍可繼續使用，牌號戳及不規則日戳逐漸被正規日戳所取替，大清帝國郵政日戳之演化舞臺也隨即落幕。

Zhong Hua Min Kuo (中華民國) was founded on January 1 1912 and the lunar year notation in regular daters was decreed to be changed to 元年(first year of the Republic). Circular bisected bilingual daters could still be used as international dater and to some extent, the nameplate cancellation would also be tolerated at the initial stages of the Republic.

#### 附錄：威海衛 / 碼頭 / 劉公島銷票戳分類表

#### Appendix: Classification of cancellations from Weihaiwei/Ma Tau/Liu Kung Tau

這個位於英國租借地內的威海衛大清四等郵局，筆者以她的日戳出現先後，可順序排列分為七大類，比較起這二十年來由耳熟能詳的英國集郵名家柏齊特 PETER I. PADGET 所區分的十一類更為適當，理由如下：（1）柏氏第 I 型為日本客郵時期軍郵日戳，而非威海衛大清分

局使用的英漢陰文圓形戳，應該更正。(2) 柏氏將英漢橢圓形日戳列為 V、VI、VII 三種型號，但筆者認為橢圓形日戳使用日期較早，現提議列為 II 型，至于不同的尺碼規格或框綫花飾以 II a、II b、II c、II d、II e、II f 來區分。(3) 矩形雙格牌號戳在遷址劉公島後才面世，故此應排列在碼頭郵局 III 型英漢雙圈日戳後成為 IV a 型，把加入遷回原址後沿用的矩形雙格威海衛列為 IV b 型和無框的列為 IV c 型。(4) 柏氏將英漢粗外圈日戳列為 VIII、IX、X 型，本人提議列入 V 型再分為劉公島 V a、碼頭 V b、碼頭（愛德華港）V c。(5) 柏氏漏列全漢文雙圈干支日戳，本人提議加入為 VI 型，至於英漢腰框形干支戳也順序排列成為 VII 型。上述七大類戳記亦以表格方式顯示如下。

The cancellations used by the fourth class Chinese Post Office Weihaiwei situated within British leased territory during the Imperial Chinese Post Office period can best be classified into seven categories according to their chronological sequence, in an effort to replace the previous classification into eleven types by Peter I. Padget for the following reasons: (a) Padget listed Japanese Post Office Army dater as type I and since this did not originate from the Imperial Chinese Post Office, it ought to be replaced by the negative seal type used by Imperial Chinese Post Office in Weihaiwei, (b) the oval bilingual daters were listed as types V, VI and VII, but since these had been used earlier than the other types, I suggest to include them under type II, with sub-types IIa, IIb, IIc, IId, IIe and II f to differentiate size, double or single outer frames, (c) rectangular two segment Liu Kung Tau Post Office nameplate type cancellation appeared after the double circle bilingual type III dater from Ma Tau Post Office and is hence classified as type IV a, similar type for Weihaiwei as type IV b and the frameless Weihaiwei as type IV c, (d) the thick outer circle bilingual types from Liu Kung Tau, Ma Tau and Port Edward were previously classified under types VIII, IX and X but they belong to the same wave of evolution and are classified as types Va, Vb, Vc correspondingly, (e) the double circle all Chinese language/three segment type lunar year dater was missing from Padget's classification, I suggest to include it as type VI and the circular central box type bilingual lunar year dater as type VII. To facilitate checking, I have prepared another table listing the seven broad categories with all their sub-types in tabular form with simple description and insertion of appropriate cancellations.

注 1 第 II 及第 III 型同步出現，由于威海衛郵局較碼頭郵局早開局，橢圓形日戳被列為 II 型。

注 2 隨着愛德華港的英國客郵局在 1904 年 4 月開辦，劉公島及碼頭之大清郵局因業務漸漸衰退而關閉。

注 3 有資深集郵家展示了一件甲辰年威海衛寄日本之郵資片，除此之外，威海衛干支日戳目前次早使用日期為乙巳年二月。

注 4 現時未能確定威海衛曾否使用漢文腰框形干支日戳，亦無法確定英漢型干支日戳最早使用日期（1907?），存世郵品以 1909 己酉年較多。

Note 1 Both types II and III evolved at around the same time, since Weihaiwei post office opened for business earlier, the oval bilingual type is listed as Type II. The use of these type II dater ceased around June 1900 when the

effects of Boxer Movement had forced Weihaiwei Post Office to relocate to the island of Liu Kung Tau.

Note 2 Sharp decline in business had caused the Imperial Chinese Post Offices in Liu Kung Tau and Port Edward to close for business after the British Post Office in Port Edward opened on April 1, 1904.

Note 3 There has been reported usage of double circle lunar year dater in 1904 on postal stationery card to Japan, apart from this, the earliest item dated 2nd month of 乙巳 (1905).

Note 4 It is still uncertain whether Weihaiwei had ever adopted the circular central box type Chinese language lunar year dater and it is equally uncertain as to the earliest usage of the English/Chinese type even though examples of 己酉 (1909) usage are readily available.
